DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 – 9 and 35 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The Patent Office Interim Guidelines for Subject Matter Eligibility under 35 USC 101 (Promulgated in the Official Gazette November 22, 2005) have come into the recent interpretation that the Examiner is charged, if the claimed subject matter results in no physical transformation of an article or physical object to a different state or thing, signal processing in and of itself producing no such result, with further considering whether a useful, concrete and tangible result is specifically recited or flows inherently from the claim. In this instance the cited claims pertain to accepting a signal or signal data, acting on the signal data electronically and producing a processed signal as a result. Therefore the result while useful is an abstraction and not a concrete and tangible result as required by the statute.

Claims 10 – 11 are allowable insofar as they pertain to an imaging apparatus structural combination.

This action is NOT made final however the case should be prepared for final action.
